

Wasiq Bhamla

Manager - Projects, Cognizant

With over 16 years of experience as a QA professional, I possess a deep understanding and extensive expertise in both Automation and Manual testing and strategies. My specialisation lies in the development and establishment of end-to-end QA processes and test automation frameworks. Additionally, I am an active contributor to open-source projects on GitHub.

SKILLS

WORK EXPERIENCE

Manager - Projects Cognizant

08/2023 - Present

Mumbai, India

Tasks and Responsibilities

- Supervised a team comprising 4 QA Engineers responsible for testing a web application in the Telecom domain.
- Contributed to elevating the quality of the project's Test Automation process through the implementation of industry best practices.
- Served as a mentor for the team, facilitating their learning of Test Automation best practices and providing guidance when they encountered challenging automation issues.

Senior QA Consultant Thoughtworks

03/2019 - 09/2022

Mumbai, India

Tasks and Responsibilities

- Developed an API Automation framework from the ground up, utilising the Façade and Builder design patterns to improve test coverage at the API level of the test pyramid for an application with a user base exceeding 100,000.
- Acted as Test Architect for a major banking client in India, contributing to the enhancement of their test automation framework architecture and implementing visual regression testing for both Web and Mobile applications.
- As a key team member, I assisted in the execution of both Automation and Manual testing for Web, API, and Mobile applications.

Lead QA Engineer CrossAsyst Technologies Ltd

04/2018 - 03/2019

Mumbai, India

Tasks and Responsibilities

- Demonstrated effective leadership as I guided a team of 3 QA engineers in the Healthcare industry, devising and implementing a comprehensive QA strategy and solution for their web-based product.
- Developed a sturdy and user-friendly test automation framework for Web and API automation.
- Acted as a mentor to team members, sharing my expertise in test automation with them to enable their contributions towards the success of the team.

WORK EXPERIENCE

Senior QA Engineer

AurionPro Solutions Pvt Ltd

01/2015 - 03/2018

Mumbai, India

Tasks and Responsibilities

- Developed and upheld test automation for both Android and iOS platforms using Appium, automating user journeys for an application with multi-device payment capability.
- Devised a comprehensive end-to-end test automation strategy and solution for a supply chain and warehouse management application using Selenium WebDriver's C# binding and SpecFlow's Cucumber.
- As a key team member, I participated in testing, automating, and maintaining more than 1000 test cases for MasterCard and Dialog, a client in Sri Lanka, for their payment domain APIs.

Software Audit Lead

Financial Technologies India Ltd

03/2007 - 01/2015

Mumbai, India

Tasks and Responsibilities

- Effectively guided a team of QA engineers in migrating more than 1000 IBM Rational Robot scripts to IBM RFT (Java).
- Developed a lightweight wrapper framework for IBM RFT, simplifying scripting and implementing the page object model.
- As a key team member, I contributed to the development of middleware for brokerage houses, aiding them in their desktop application testing efforts through both Manual and Automation testing.
